PROFILE

Justin loves working with others to create solutions that are gratifyingly intuitive and engaging. He enjoys connecting with people to find their joys and pains while working with products. He is always on the lookout for more concise and creative ways to communicate new ideas.

EXPERIENCE

2017
UX Designer, Mobile Developer | Freelancer
Impacted each stage of the development lifecycle.

Designed, developed, and pushed to production with high percentage of returning clients. Used mockups, video presentations, and prototypes to communicate design decisions.

2017
Coding Instructor | Code Gakko
Communicated complex principles in concise ways.
Taught coding and UX design principles to secondary school students using MIT App Inventor. Students were taught how to create basic user-centered designs to build their own purposeful apps.

2015
Teacher's Assistant | Brigham Young University
Understood coding restraints and best practices

Taught basic data structures and coding practices in C++. Debugged and managed students' code to teach more efficient programming.

EDUCATION

2016
B.S. in Computer Science | Brigham Young University, USA
Equipped me to work with and understand developers on a deep level

CS 456   Designing the User Experience
Led team to rank second for best UX product amongst a class of six groups

CS 256   Intro to User Experience Design
Led team to be awarded best UX prototype amongst a class of six groups

CS 340   Software Design and Testing
Created full Android app in a team using design documents, Pert and Gantt charts, and UML diagrams
